Company Profile

MAKRITE Industries has been in the business of personal safety and protection for decades — since developing our first exceptional face masks in 1984, well before the global pandemic forced everyone, everywhere to pay attention to respiratory health.

Today our products are in high demand in medical, industrial, automotive and consumer environments worldwide. We have a reliable track record of keeping people safe and productive while keeping costs low.

That’s why the National Institute for Occupational Health and Safety (NIOSH) stands behind more than 75 of our disposable respirator products, produced using specially designed, high-tech equipment. This guarantees a superior level of quality and consistency with each face mask we produce. In fact, Makrite products have earned similar approvals—including EN149/CE—from European governments and agencies, along with regulatory bodies in countries such as UK UKCA, Australia AS/NZS, Japan MHLW, Korea KOSHA, China LA and Halal.

We’re based in Taiwan, with significant satellite offices in the US, China, Korea and Singapore and Thailand. As the largest private brand manufacturer of disposable respirators for the North American market, Makrite supplies major US retailers and a wide range of other well-known companies that value our reliable customer service, dependable quality and competitive pricing.

After four decades of R&D, we welcome opportunities to further develop our products to meet the changing needs of the industries and partners we serve. We look forward to doing the same for you.

NIOSH N95

NIOSH-Approved Respirators

The National Institute for Occupational Safety and Health (NIOSH) is a United States federal agency responsible for conducting research, providing guidance, and making recommendations for the prevention of work-related injuries, illnesses, and fatalities.

Respirators certified by NIOSH means those respirators have met the standards set by NIOSH in terms of filtration efficiency, breathing resistance and air valve leakage.

US NIOSH protective mask grading standards

Grade	Filtering Efficiency			Remark
	95%	99%	99.97%	
N-Type	N95	N99	N100	Not resistant to oil
P-Type	P95	P99	P100	oil Proof
R-Type	R95	R99	R100	Resistant to oil

CERTIFICATE INTRODUCTION:

Approval Holder
 Makrite Industries, Inc.
 11F-5, No. 79, Sec 1, Xin Tai Wu Road, Xizhi Dist., 221 New Taipei City, Taiwan.
 Tel: +886-2-2698-2419

This respirator is approved only in the following configuration:

TC-Approval Number	Protection	Respirator Model	Cautions and Limitations ²
84A-6806	N95	Envi-910F X	ABCJMNP

1. Protection
 N95-Particulate Filter (95% filter efficiency level) effective against particulate aerosols free of oil; time use restrictions may apply

2. Cautions and Limitations
 A - Not for use in atmospheres containing less than 19.5% oxygen.
 B - Not for use in atmospheres immediately dangerous to life or health.
 C - Do not exceed maximum use concentrations established by regulatory standards.
 J - Failure to properly use and maintain this product could result in injury or death.
 M - All approved respirators shall be selected, fitted, used, and maintained in accordance with MSHA, OSHA and other applicable regulations.
 N - Never substitute, modify, add, or omit parts. Use only exact replacement parts in the configuration as specified by the manufacturer.
 O - Refer to User's Instructions, and/or maintenance manuals for information on use and maintenance of these respirators.
 P - NIOSH does not evaluate respirators for use as surgical masks.

NIOSH-APPROVED RESPIRATORS

9600 COMFORT SERIES

The 9600 Comfort Series, our newest line of NIOSH-approved respirators ensure that you are getting a respirator that meets the highest standards of performance and reliability. The foldable design of the Makrite 9600 brings a new level of versatility to your workplace. Easily stow it away when not in use, and effortlessly unfold it when you need immediate protection. Its compact size makes it ideal for professionals on the go, ensuring you're always prepared for any situation.

NIOSH-APPROVED RESPIRATORS

9500 COMFORT SERIES

Experience unmatched protection with the Makrite 9500, the leading series of NIOSH-approved N95 disposable respirators from Makrite. Trusted by professionals worldwide, the Makrite 9500 offers superior respiratory protection in a comfortable cone style design. With its high filtration efficiency, it effectively blocks out airborne particles, ensuring clean and safe breathing. The adjustable nose piece and secure fit provide added comfort and confidence throughout the day.

NIOSH-APPROVED RESPIRATORS

MK COMFORT SERIES

A premium choice for those seeking an alternative to our 9600 and 9500 models. The MK Comfort series features a distinctive flanged edge encircling the mask, ensuring a snug and secure fit for some users. In response to wearer preferences, we have reimagined the internal nosepiece, crafting it with a thinner, elongated strip of PVC foam. Setting it apart from our 9600 and 9500 Comfort Series, the MK Comfort Series is equipped with a square exhalation valve, providing an added element of differentiation. Elevate your comfort and confidence with the MK Comfort Series, setting new standards of excellence in respiratory protection.

ENVI COMFORT SERIES

A highly sought-after choice in the food service industry renowned for its eco-friendly composition, free from any metallic components. The Envi Comfort Series features a soft, pre-shaped nose area that guarantees an exceptional fit across diverse face sizes and contours, effortlessly conforming to the wearer's unique nasal bridge for optimal comfort. For added convenience, the looping-style headstrap enable easy donning and doffing of the mask, while also allowing it to be conveniently draped around the neck when not in use. Complemented by a soft inner layer and optimized breathing resistance, the Envi Series offers unparalleled comfort that surpasses expectations.

NIOSH-APPROVED RESPIRATORS

VERTICAL FOLD SERIES

In North and South America, there is a noticeable trend among wearers, with approximately 25% favoring the versatility and adaptability of vertical- and flat-folded respirators—a figure that continues to rise annually. Many individuals prefer these styles due to their enhanced flexibility around the edges, allowing for a seamless fit that conforms to facial features with greater ease compared to cone-style masks. When not in use, this mask conveniently folds down the middle, facilitating effortless storage. Furthermore, it fits well with goggles or helmets, making it an ideal choice for a wide range of work environments.

NIOSH-APPROVED RESPIRATORS

VERTICAL FOLD SERIES & FLAT FOLD SERIES

In North and South America, there is a discernible trend wherein approximately 25% of consumers favor the vertical and flat folded style respirator, a figure that continues to experience steady growth. This preference is driven by the respirator's exceptional flexibility along the edges, enabling seamless adaptation to the wearer's facial features. In fact, for some individuals, the vertical and flat folded style offers even greater adaptability compared to traditional cone-style respirators.

NIOSH-APPROVED RESPIRATORS

500 COMFORT SERIES

Specifically designed to protect against metal fumes, including ozone. These exceptional respirators feature a very smooth inner surface, ensuring excellent comfort during extended wear. Equipped with fully adjustable headstraps and a full inner face seal, they guarantee a secure and personalized fit for every wearer. The flame retardant outer layer adds an extra layer of protection, while the preformed nose area, enhanced with an adjustable aluminum nose clip, ensures a seamless fit and optimal wearer comfort.

NIOSH-APPROVED RESPIRATORS

N99 RESPIRATORS

The N99 provides greater than 99% filter efficiency protection against non-oil based particulates. Our NIOSH approved N99 respirators contain breathable, skin-friendly and soft properties, which can be used in various settings and works against air pollutants, pollen and dust particles.

NIOSH-APPROVED RESPIRATORS

P95 RESPIRATORS

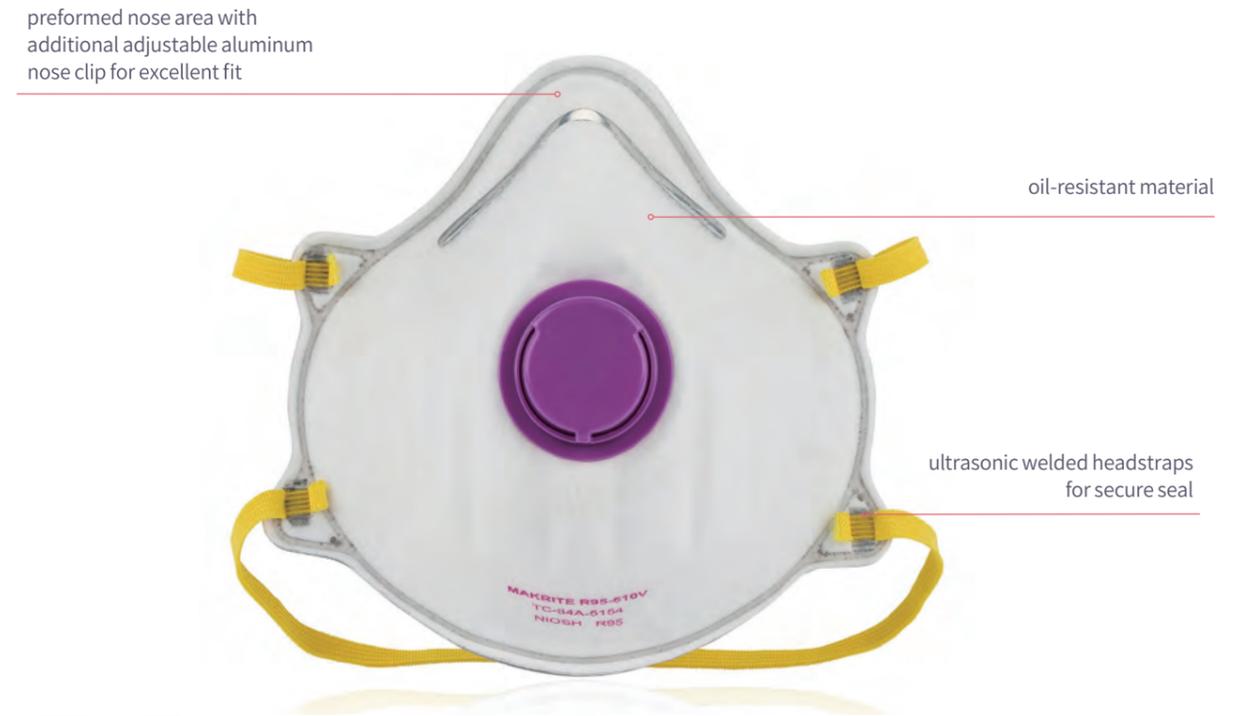

P95 respirators provide greater than 95% filter efficiency against oil and non-oil-based particulate aerosols. The P95 is strongly resistant to oils, according to NIOSH standards. These respirators are also available with a layer of activated carbon for nuisance odor relief and an exhalation valve for easy breathing.

NIOSH-APPROVED R95 RESPIRATORS

R95 RESPIRATORS

R95 respirators provide greater than 95% filter efficiency against oil and non-oil-based particulate aerosols. The R95 is somewhat resistant to oils, according to NIOSH standards. Different versions are also available with a layer of activated carbon for nuisance odor relief and an exhalation valve for easy breathing.

NIOSH-APPROVED N95 RESPIRATORS

HYBIRD STYLE

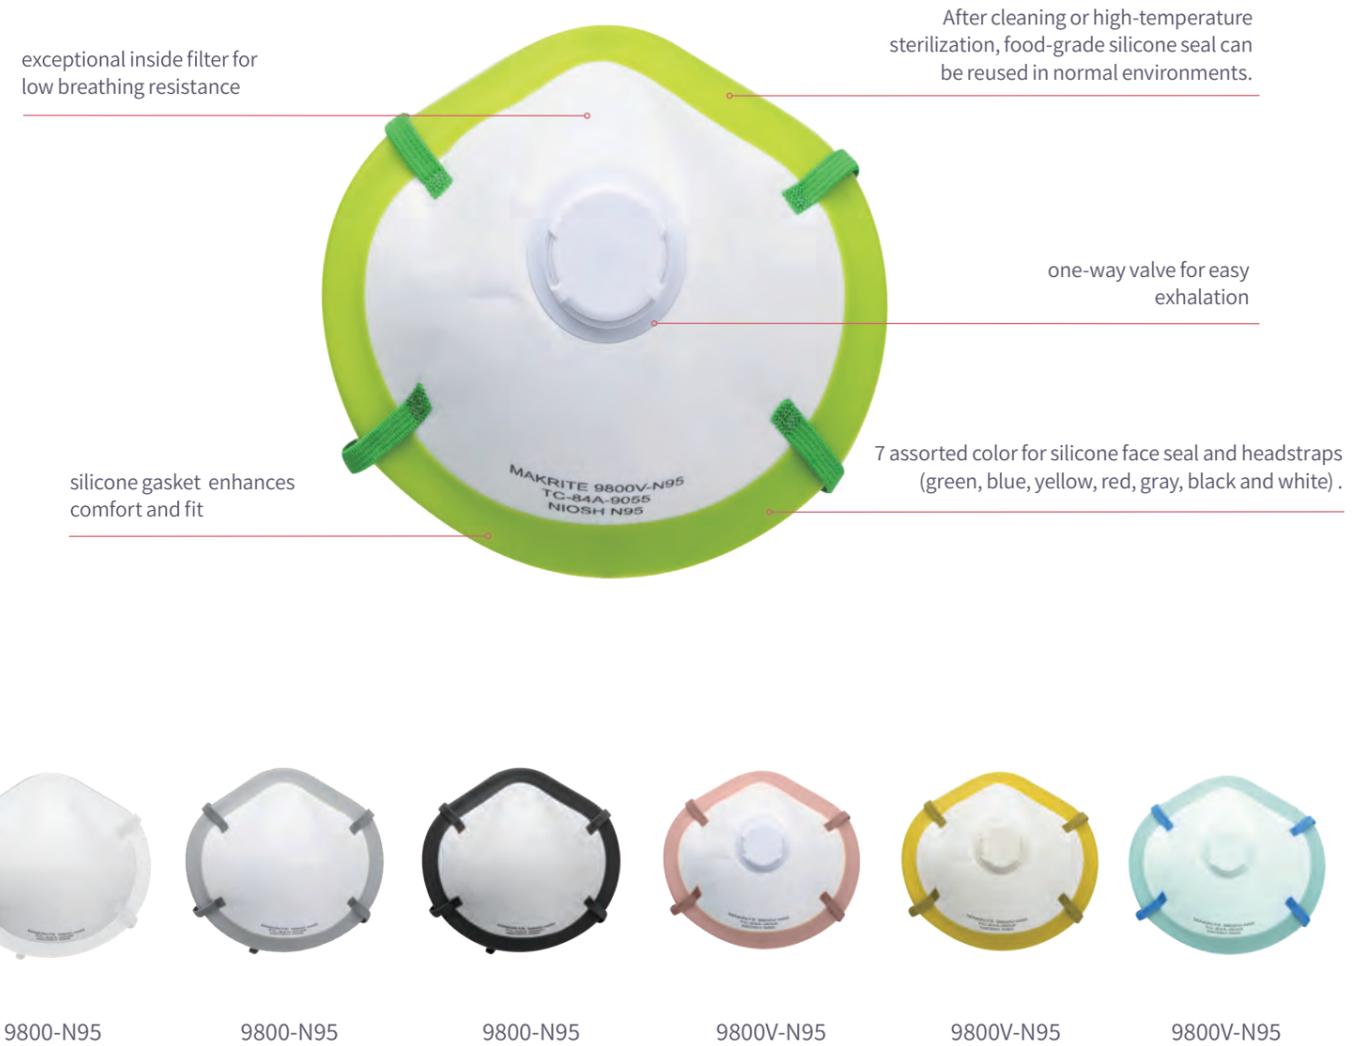

Our innovative FIT-N95 respirator, available with or without an exhalation valve, combines the advantages of cone and flat folded styles in one. Engineered with flexible edges, this respirator conforms to the facial contours of most wearers, ensuring a secure yet comfortable seal. The unique fold-out front design provides distance from the mouth, similar to traditional cone-style masks, enhancing breathability and reducing moisture buildup.

NIOSH-APPROVED N95 RESPIRATORS

9800 SERIES

Our commitment to environmental protection is evident in every aspect of this innovative design. A reusable full face seal series with food-grade silicone material was developed for this purpose. The soft silicone gasket integrated into each respirator enhances both comfort and fit, ensuring a secure and customized seal for every wearer.

CE & UKCA-APPROVED RESPIRATORS

The CE certification is an essential requirement for products intended to be sold in the European Economic Area (EEA). It serves as a mark of compliance with rigorous European health, safety, and environmental protection standards. When you see the CE logo on a commercial product, it signifies that the manufacturer or importer affirms the product's conformity to these standards. In the case of masks, which fall under the category of personal protective equipment (PPE), compliance with the Personal Protective Equipment Regulation (EU) 2016/425 is crucial. Rest assured, Makrite respirators meet the stringent CE standards, ensuring their ability to effectively filter both non-oil and oil-based particles for optimal protection.

- FFP1- filters at least 80% of airborne particles
- FFP2- filters at least 94% of airborne particles
- FFP3- filters at least 99% of airborne particles

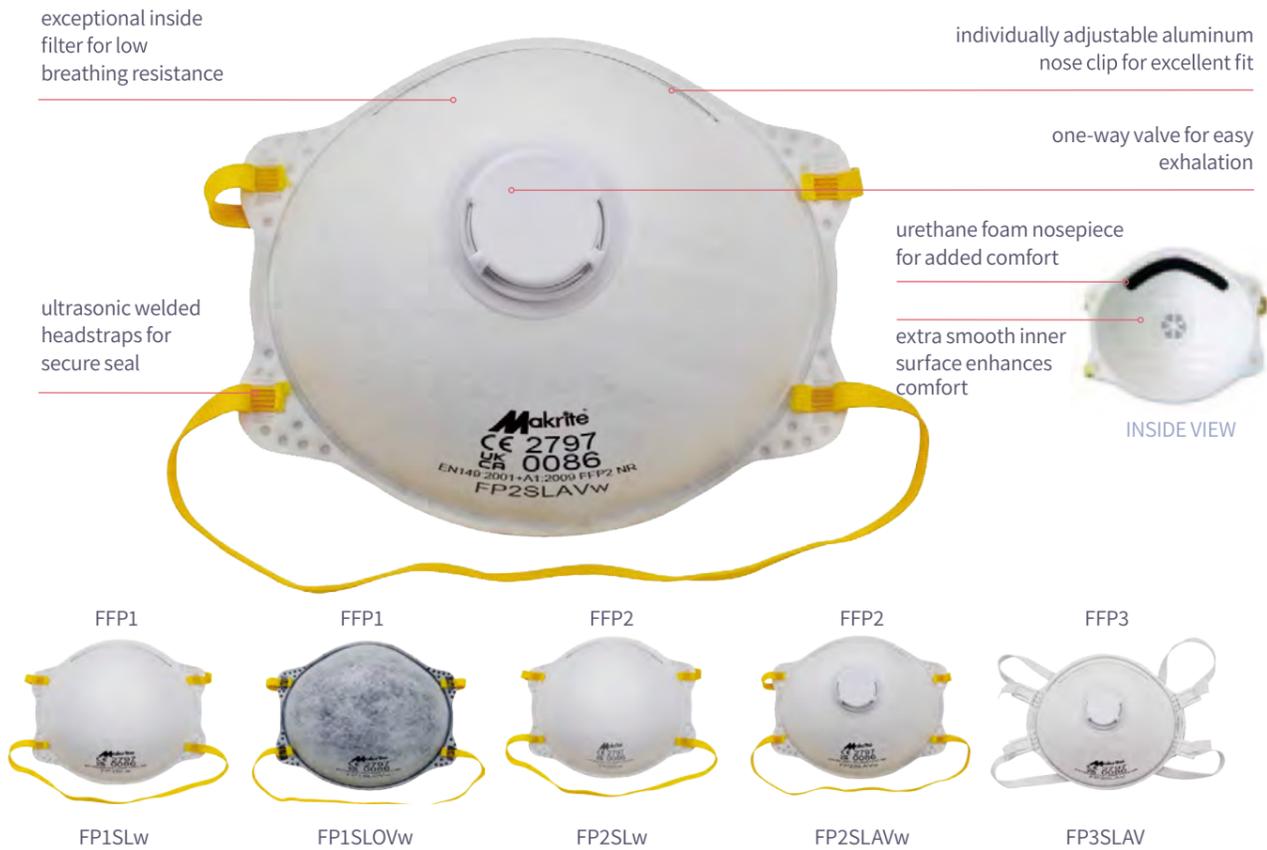

UKCA is the abbreviation of UK Conformity Assessed. The UKCA mark is a safety mark for British products and is applicable to products sold in England, Scotland and Wales.

CE & UKCA-APPROVED RESPIRATORS

STANDARD COMFORT SERIES

The Standard Comfort Series is officially approved for use in European Union countries and others that follow the CE respirator protocols. These respirators meet all levels of EU safety standards, including FFP1, FFP2, and FFP3 classifications, ensuring optimal protection for the wearer. They are compatible with various head- and hearing-protection products, offering versatility in different work environments. Our range includes models without exhalation valves, suitable for work environments that pose no breathing challenge, as well as options with advanced exhalation valves for enhanced comfort in hot and humid work settings. Additional features such as adjustable headstraps, various comfort enhancements, and an optional carbon layer for odor relief are available, allowing for a tailored and personalized experience.

FIT SERIES

Our FIT Comfort Series (available with or without an exhalation valve) combines the best elements of cone-style and flat-folded respirators. Designed with precision, the flexible edges effortlessly conform to the wearer's facial contours, ensuring a secure yet comfortable fit. Moreover, the fold-out front provides the desired distance from the mouth just as the traditional cone-style respirators.

500 COMFORT SERIES

The 500 Comfort Series is designed with a prominent emphasis on environmental friendliness and comfort. Its unique pre-shaped nose area guarantees an exceptional fit for diverse facial sizes and shapes. Free from any metallic components, the series incorporates a soft inner layer, offering users the utmost comfort during wear. Available in both FFP1 and FFP2, it also provides options with or without an exhalation valve and an additional activated carbon layer, meeting the specific work environments and individual requirements.

CE & UKCA-APPROVED RESPIRATORS

ENVI COMFORT SERIES

The ENVI Series of respirators is designed without any metal in the construction, ensuring they are environmentally friendly. The soft inner layer provides maximum comfort for the user's face. The adjustable looping-style head straps offer a convenient way for individual adjustment during donning and doffing. The head strap loop design allows the mask to be easily hung around the neck when not in use. With low breathing resistance, these respirators offer a highly comfortable wear experience. The soft pre-shaped nose area ensures an excellent fit for various facial sizes and should be adjusted up and down the wearer's nose bridge area for a proper fit. Due to these features, this respirator has gained significant preference in the food service industry.

300D & 880 COMFORT SERIES

Compare to the 300 comfort series, the head-straps of 300D series masks are replaced with anti-skidding rubber material, making it more convenient for the wearers to adjust the straps with the adjustable buckles design. Additionally, the mask features fully adjustable loop head-straps for proper fit. The new 880 Comfort Foldable Mask Series meets the optional requirement of dolomite clogging test. The mask design improves the fit between the mask and the face, providing enhanced safety protection. In addition, the streamlined patterns on the mask provide a modern aesthetic. The foldable design allows for easy storage and portability and can effectively be used in conjunction with safety goggles and helmets.

FIT & 300 COMFORT SERIES

Our FIT Comfort Series (available with or without an exhalation valve) combines features of both the cone and flat-folded styles of respirators. The flexible edges conform to wearers' facial features with a tight but comfortable seal, and the fold-out front allows for the same distance from the mouth as in traditional cone-style masks. Soft to the touch, the 300 Comfort Series is exceptionally easy to wear. Ultrasonically welded headstraps provide a strong seal and can withstand heavy use.

MHLW-APPROVED RESPIRATORS

MHLW SERIES

The MK 910-DS2 series respirators are certified by the Japanese MHLW standard. These respirators are designed as an alternative to our 9500 comfort series. The primary difference between the two is that the MK design features a "flanged" edge all around the mask, as some users prefer this type of seal to the face. Additionally, the MK respirator includes a PVC nose foam on the inner surface, providing a better seal. The filter media is designed for low breathing resistance, ensuring maximum comfort for users.

MHLW-APPROVED RESPIRATORS

MHLW SERIES

The 9600 DS2 Series, our newest collection of MHLW-approved respirators ensure that you are getting a respirator that meets the highest standards of performance and reliability. The foldable design of the 9600 DS2 brings a new level of versatility to your workplace. Easily stow it away when not in use, and effortlessly unfold it when you need immediate protection. Its compact size makes it ideal for professionals on the go, ensuring you're always prepared for any situation.

HALAL-Approved Respirators

"Halal" is an Arabic word that translates to 'permissible' in English. A Halal certificate is a qualification issued by a qualified independent third-party supervisory organization for food, medicine, chemicals, additives, etc., ensuring that they conform to Halal regulations as required by Muslims. A product with a Halal certificate indicates that it is suitable and acceptable for Muslims.

LA-Approved Respirators

In 2015, the China State Administration of Work Safety issued Order No. 80, titled "Decision of the State Administration of Work Safety on Abolishing and Amending Ten Regulations in the Fields of Labor Protection Articles and Safety Training." This order explicitly repealed the previously established "Regulations on the Supervision and Administration of Labor Protection Articles" (State Administration of Work Safety Order No. 1 issued on July 22, 2005).

Article 6 of the abolished "Regulations on the Supervision and Administration of Labor Protection Products" stipulated that special labor protection products were subject to mandatory safety sign management. Consequently, the certification process for "labor safety certification" underwent a significant transformation. It shifted from the former national compulsory certification to a system of enterprise self-declaration certification.

LA-APPROVED RESPIRATORS

GB 2626-2019

Introducing the LA-approved KN95 product, featuring an ergonomic design that provides a good fit and unparalleled comfort for wearers. It offers a 95% standard minimum filtration efficiency of 0.3-micron particles, ensuring reliable breathing protection against oil-free aerosols. The adjustable nosepiece reduces the potential for eyewear fogging while providing a custom and secure seal. The inner urethane foam for the nose, combined with the high elasticity head straps, ensures a tight and secure seal for superior protection

Against non-oil-based particulates, such as minerals, iron, ore, flour or other substances.

Do not use in areas where the oxygen concentration is lower than 19.5%.
Do not use for protection against toxic gases and vapors.

LA-APPROVED RESPIRATORS

We also have dual-certified products with NIOSH N95/P95 certification

Surgical Masks

Surgical masks, widely used in various fields, including medical, dental, food processing, and laboratories, serve as examples of personal protective equipment designed to safeguard the wearer from particles or liquid contamination on the face.

Apart from offering general surgical masks, we also offer a professional medical series. These masks are designed with an additional layer of special fabric, providing effective protection against saliva and blood without compromising breathing comfort. Furthermore, these masks have successfully passed the blood penetration test of ASTM/F1862-2000a, meeting the performance level requirements of EN 14683 Type IIR standards.

NIOSH-APPROVED N95 RESPIRATORS

SURGICAL N95 RESPIRATORS

Surgical N95 respirators are examples of personal protective equipment that are used to protect the wearer from particles or from liquid contaminating the face. In addition to meeting NIOSH N95 standards, these products also pass additional testing for fluid resistance, flammability and biocompatibility. The Food and Drug Administration (FDA), Centers for Disease Control and Prevention (CDC) and the National Institute for Occupational Safety and Health (NIOSH) together regulate these respirators.

individually adjustable aluminum nose clip for excellent fit

exceptional inside filter for very low breathing resistance

FDA 510K PLEATED FACE MASKS

Pleated mask is widely used in different industries, including medical, dental, food service, laboratories and even daily civilian uses. Here we have the same high quality pleated mask with tie-on bands and ear loops to satisfy different users' needs. Those pleated masks have passed ASTM F2100 Level 3.

CE-APPROVED & UKCA-APPROVED RESPIRATORS

CE Medical Face Masks

Medical Comfort Series are industrial and medical respirators that have passed the dual certification of European CE EN149 FFP2 NR D and CE EN14683 Type IIR, which can meet the needs of customers in both industrial and medical industry. The headstrap design is more convenient for users to adjust according to their needs. Compared with ear-loop masks, it is less likely to fall off, ensure the wearer can wear it more firmly during work, and also allow the wearer to hand it easily on their neck when not using.

Makrite Medical Series

Disposable Medical Masks: Meet the requirements of YY/T0969-2013 Disposable Medical Masks, medical masks are suitable for wearers who are working in an ordinary medical environment with no risk of body fluids and splashes, and provides a certain physical barrier to prevent the direct penetration of pathogenic microorganisms and particulate matter.

Medical Protective Masks: Meet the requirements of GB 19083-2010 Technical Requirements for Medical Protective Masks, these masks are mainly suitable for medical institutions and people who are exposed to viral materials to prevent the transmission of viruses from patients to medical workers.

DISPOSABLE MEDICAL MASKS

Disposable medical masks are widely used in different industries, including medical treatment, food processing, electronics, pharmaceuticals, laboratories, daily life and other industries that pay high attention to hygiene. The bacterial filtration effect can reach more than 95%. This product provides health care for the wearers who work in an ordinary medical environment without risk of body fluids and splashes, creating a certain physical barrier to prevent the direct penetration of pathogenic microorganisms and particulate matter.

latex-free elastic ear loops, allergy friendly

pleated design increases the protection area and reduce pressure on the face

special static filter layer can effectively filter dust and microorganisms

flexible nose clip provides excellent fit for the majority of people

breathing resistance is only 20 pa/cm² for easy breathing

skin-friendly polypropylene non-woven fabric ensures comfort and breathability

MEDICAL PROTECTIVE MASKS

Medical protective masks are widely used in different industries, including medical treatment, food processing, electronics, pharmaceuticals, laboratories, daily life and other industries that pay attention to hygiene. The filtering effect of particles above 0.3 microns can reach more than 95%. This product is suitable for wearers who are not surgical staff at first-line nor who are exposed to viral materials in medical institutions, which are used to prevent the spread of viruses from patients to medical workers. This series of masks have obtained both GB 19083 and NIOSH N95 certifications.

adjustable concealed aluminum nose clip and 3D nose foam for proper fit

breathing resistance is only 10mmH₂O for easy breathing

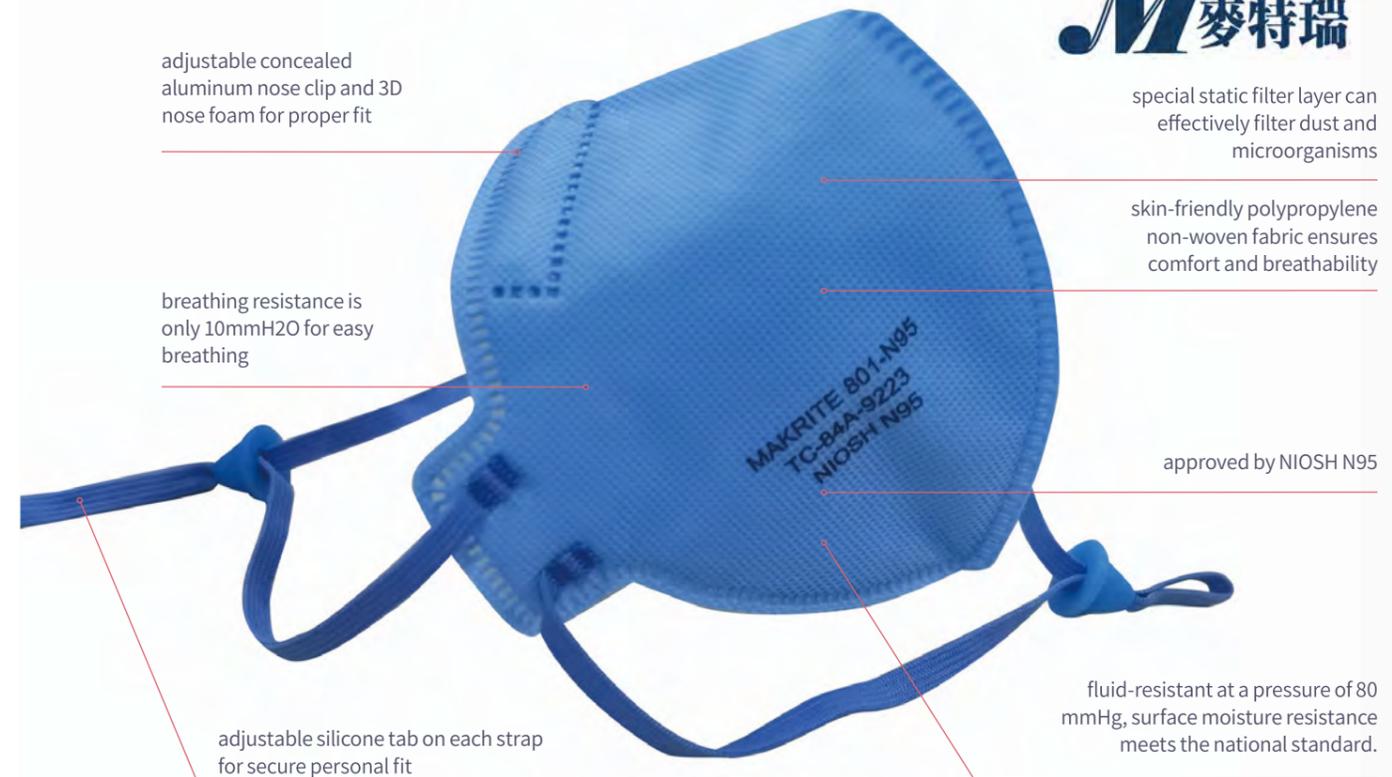

adjustable silicone tab on each strap for secure personal fit

special static filter layer can effectively filter dust and microorganisms

skin-friendly polypropylene non-woven fabric ensures comfort and breathability

approved by NIOSH N95

fluid-resistant at a pressure of 80 mmHg, surface moisture resistance meets the national standard.

Makrite & huSHE Series

Makrite is a civilian mask brand under Makrite Industries that integrates R&D, production and sales. With a mature supply chain, professional R&D strength and innovative design capabilities, it provides consumers with trendy and comfortable masks. Its product line is mainly divided into disposable face masks, stylish masks, children masks and other series.

huSHE is a civilian brand launched by Makrite in 2022. Makrite expands its expertise in manufacturing industrial masks that has been cultivated for many years to the civilian market, exploring the functional aesthetics of masks. From sports style to fashion style, consumers can always choose the one that fit their needs from a variety of products.

huSHE

MAKRITE

huSHE—Based on the principles of reassuring, comfort and fashion, huSHE will guard your health by improving your breathing experience.

Disposable Face Masks for Adult

- Bacterial filtration efficiency up to 95%
- Pressure-less bubble ear straps for extra comfort
- Premium melt-blown filtration layer provides upgraded protection
- Waterproof outer layer can isolate the dust and droplet better
- Skin-friendly hydrophilic inner layer ensures breathability
- Individually packaged for more convenient and easy-to-carry
- Choose from classic black and white or fashionable morandi color

Korean Style 4D Mask

- 4D design fit perfectly to the face
- Bacterial filtration efficiency up to 95%
- Pressure-less bubble ear straps for extra comfort
- Premium melt-blown filtration layer provides upgraded protection
- Waterproof outer layer can isolate the dust and droplet better
- Skin-friendly hydrophilic inner layer ensures breathability
- Individually packaged for more convenient and easy-to-carry
- Choose from classic black and white or fashionable morandi color

CF800

- Patented dual-purpose double-valves design help rapidly exhaust hot humid air, increasing breathing comfort
- Upgraded environmental concept, replaceable filter element same as N95 grade
- Washed by water without deformation
- Adjustable head strips for proper fit
- 3D shape ergonomic stylish design
- Combination of nose clip and M-shaped nose foam perfectly improves fitness of mask, reduces potential for eyewear fogging

M AKRITE®

净舒式

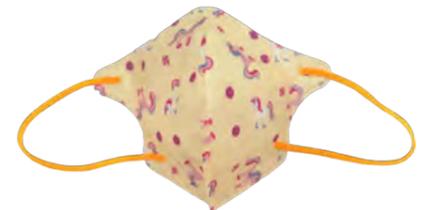

Makrite combines product manufacturing experience, high-standard inspection and stylish aesthetic design to provide safe and high-quality masks, optimizing the wearer's breathing experience. Classic black and white or fashionable morandi colors both are provides for easy-matching.

880S Kids Mask

This kids mask fully complies with the requirements of the China New National Standard for Children on protection performance, comfort performance and safety performance, which can meet all the needs of the children. The 3D three-dimensional structure with light-weight and breathability, leaving more space for children's mouth and nose. The high-elastic ear loops and adjustable nose clip to ensure overall safety protection and no strain of ears. Different colorful printed design fits both boys and girls to match daily dress, which can be used indoor, school, kindergarten and other public place.

Features:

1. The shell shape and folded design can fit different faces, wrap the chin, the gap is smaller, perfect for kids to wear.
2. The high-elastic ear loops and adjustable nose clip to ensure overall safety protection and no strain of ears.
3. Nosefoam-free design increase safety.
4. Passes U.S.A Nelson authoritative sensitivity test, the skin-friendly and soft material prevent allergies.

Disposable Kids Mask

Children's disposable masks fit comfortably and designed to be lightweight and breathable for the kids. With the feature of unfolding and expanding, the face masks will ensure full coverage of kid's nose and mouth, while the soft ear loops will not cause discomfort or irritation.

Features:

1. Design for smaller faces provides a better seal.
2. Three layers of filtration, comfortable and easy breathing.
3. Extra-elastic earloops ensure a comfortable protection.
4. Adjustable nose clip.

According to the survey of consumer demand, our R&D team developed the 9900 series which is specially designed for daily use with both professional protection and wearing comfort. Double wearing mode of earloop and headstraps allows consumers to choose the wearing method in different scenarios.

The earloop mode increase the fit and tightness by adjusting the elastic band while the headband mode liberates the ears which is not easy to fall off in the working environment. In addition to the foldable design for easy pocketing, there are also activated carbon and air valve styles for consumers to choose from.

G520 NON-POWERED AIR-PURIFYING HALF MASK PARTICULATE/CHEMICAL CARTRIDGE RESPIRATOR

Makrite G520 series of non-powered air-purifying respirators/chemical cartridge respirators have passed the inspection of the third-party institution. The respiratory mask is available against certain chemical gas or particulate when it is assembled with different Makrite's chemical cartridges or filters, which are comply with China's GB 2626-2019 & GB 2626-2009 non-powered air-purifying particulate respirator specifications.

silicon face seal to eliminate skin swelling and itching or other allergic reactions

free-sliding design of the headstrap is convenient for the wearer to use

patented side-rail buckle design allows easy assemble, disassemble and cleaning

butterfly-shaped exhalation valve design, which increases the amount of air exhaled and reduces the heat and moisture build inside the chamber

The G520 series of respirators adopts a direct-connect half mask design, which is only suitable for use in the working environment that is non-air supplied. G520 series half mask respirators are available in three sizes, please refer to the product information below for the applicable head size range.

NEW PRODUCT LAUNCH

MK1002 COLLAPSIBLE NON-POWERED AIR-PURIFYING HALF MASK PARTICULATE RESPIRATOR

Makrite MK1002 series of non-powered air-purifying particulate respirators have passed the inspection of the third-party institution. The half mask respirator is available against particulate when it used with approved particulate filters. Comply with GB/T 18664-2002 and the U.S.A. Occupational Safety and Health Administration (OSHA) federal regulations, the respirators can be used to protect against certain airborne contaminants depending on the environment and type of respiratory hazards that need to be filtered and the respirators also comply with China's GB 2626-2019 regulations.

ergonomically designed to perfectly fit the contours of the face

adjustable head straps are suitable for most head sizes, designed for tight and comfortable wearing

foldable silicone mask body takes up less space for easy storage

matched with particulate filter and spray proof filter retainer

This series half masks respirators has only one size. Please refer to the product information below for choosing the applicable face size. There are five color options for the body, and different colors will not affect the function and protection of the respirators.

M200 NON-POWERED AIR-PURIFYING HALF MASK PARTICULATE/CHEMICAL CARTRIDGE RESPIRATOR

The M200 non-powered air-purifying half mask particulate/chemical cartridge respirator series are made of advanced composite materials with high strength and high resilience. Also, the soft, lightweight material and the well-balanced design enhances comfort and allows easy cleaning. The adjustable head strap design is convenient for users in compatible with other personal protection equipment such as safety glasses, ear plugs, hard hats, etc.

soft, skin-friendly and non-irritating material to fit the face contours perfectly, preventing the leakage

compares to double-cartridges half mask, the single-cartridge half mask is lighter and more comfortable for long-term wear, and easy to clean and maintain

buckled design allows easy assemble, disassemble and cleaning

The elastic head strap has good extensibility, and the adjustable buckle provides convenience for wearers to freely adjust the length, both of them are designed for tight and comfortable wearing

The M200 half mask body can be combined with different filter accessories to meet the diverse needs of consumers.
 Combination 1: combination of MK series chemical cartridges, MF022A KN95 particulate filter cotton and MK9000C filter cotton cover for protecting against certain chemical vapor and particulates.
 Combination 2: combination of MK1002F single spray proof filter retainer and MF022B KN95 particulate filter cotton for protecting against particulates.
 Combination 3: combination of MK1002G single filter retainer and MF022B KN95 particulate filter cotton for protecting against particulates.

ITEM	DESCRIPTION	PACKAGING
M200	Non-Powered Air-Purifying Half Mask Respirator	1 pc/bag/box; 24 boxes/case
MK2113-GB	Single P-A-1 Chemical Cartridge, Protect Against Organic Vapors (complies with GB 2890-2009 standard)	1 pc/bag; 8bags/box; 10 boxes/case
MK2114-GB	Single P-K-1 Chemical Cartridge, Protect Against Ammonia and Its Derivatives (complies with GB 2890-2009 standard)	1 pc/bag; 8bags/box; 20 boxes/case
MK2117-GB	Single P-E-1 Chemical Cartridge, Protect Against Acid Gas (complies with GB 2890-2009 standard)	1 pc/bag; 8bags/box; 20 boxes/case
MK1002G	Single Filter Retainer (used with filter cotton)	1 pc/bag; 10bags/box; 12 boxes/case
MK9000C	Cartridge - Filter Cotton Cover (used with chemical cartridge and filter cotton)	1 pc/bag; 10bags/box; 12 boxes/case
MF022A	KN95 Particulate Filter Cotton (complies with GB 2890-2009 standard, used with chemical cartridge and filter cotton cover)	2 pcs/bag; 50bags/box; 12 boxes/case
MF022B	KN95 Particulate Filter Cotton (complies with GB 2890-2009 standard, used with single filter cotton container)	25 pcs/bag; 4bags/box; 12 boxes/case

APPLICABLE HEAD SIZE RANGE

Face Width 132.5-158.5(MM)

Face Length 108.5-138.5(MM)

NEW PRODUCT LAUNCH

G510 NON-POWERED AIR-PURIFYING HALF MASK PARTICULATE/CHEMICAL CARTRIDGE RESPIRATOR

Makrite G510 series of non-powered air-purifying particulate/chemical cartridge respirators have passed the inspection of the third-party institution. The half mask respirator is available against particulate when it used with approved particulate filters. Comply with GB/T 18664-2002 and the U.S.A. Occupational Safety and Health Administration (OSHA) federal regulations, the respirators can be used to protect against certain airborne contaminants depending on the environment and type of respiratory hazards that need to be filtered. The G510 series have approved by China's GB 2626-2019 and NIOSH (The National Institute for Occupation Safety and Health) regulations.

The G510 Series Non-Powered Air-Purifying Half Facepiece Respirator is made of silicon, which is less likely to cause skin swelling and itching or other allergic reactions than rubber mask.

G510 is a kind of air-purifying respirator which adopts the bayonet connection design, only applicable for the working environment that non-powered air-purifying respirators are used.

The body of this series of half facepiece respirator adopts the design of slide-rail buckle that has obtained a US invention patent. It includes a front cover that can be assembled to or disassembled from the mask body through a linear one-way movement and the whole set of respiratory equipment is easy to disassemble and clean.

This series of half facepiece respirator adopts butterfly-shaped exhalation valve design that has obtained a US invention patent. Its performance of exhalation resistance is very well. When using, the breathing is smooth and easy to avoid the chamber becomes too hot and humid.

MK1001 COLLAPSIBLE NON-POWERED AIR-PURIFYING HALF MASK PARTICULATE RESPIRATOR

Makrite MK1001 series of non-powered air-purifying particulate respirators have passed the inspection of the third-party institution. The half mask respirator is available against particulate when it used with approved particulate filters. Comply with GB/T 18664-2002 and the U.S.A. Occupational Safety and Health Administration (OSHA) federal regulations, the respirators can be used to protect against certain airborne contaminants depending on the environment and type of respiratory hazards that need to be filtered and the respirators also comply with China's GB 2626-2019 regulations.

free-sliding design of the head strap is convenient for the wearer to use

foldable silicone mask body takes up less space for easy storage, silicon face seal to eliminate skin swelling and itching or other allergic reactions

can match with different level particulate filter pads

The MK1001/MK1002 series of respirators adopts a direct-connect half mask design, which is only suitable for use in the working environment that is non-air supplied. The respirators are available in five colors and different colors will not affect the function and protection of the respirators, please refer to the product information below for the applicable head size range.

*Products that have approved by NIOSH

WHY CHOOSE MAKRITE?

As with any business decision, there are plenty of factors to consider. We see these as among the most important:

Highest-quality products

Our top priority is to provide you with the best possible disposable respirators. We do this by investing a lot of time and energy in our initial product designs and development. We then ensure that each and every respirator is produced to our exacting standards using sophisticated, specially designed equipment. Our quality control and laboratory testing departments complete the process so that we consistently ship the same product every time you order.

Globally competitive pricing

Our pricing is value-oriented, guaranteeing a high-quality product that meets rigorous NIOSH and other government-approved standards at very competitive prices in the US and elsewhere around the world. And while we may not be the lowest priced manufacturer in Asia, given the number of major companies that turn to us for private brand respirators, we are the most significant and reliable one.

Private brand packaging

Many of our customers market our products in their own brand packaging. We encourage this since it enables you to sell the best respirators in the world with your company's name on the mask and packaging. When you order from Makrite, both the smaller inner boxes with the masks and the outer shipping cartons are branded with your company's name. Plus the only place your customers can purchase the product is through your company.

Unbeatable customer service

At Makrite we offer only the highest levels of service and support to customers around the globe. We provide prompt and personal responses to all of your questions, comments and concerns. Regardless of where you are or how large or small your concern might be, we invite you to call us at **1-800-379-9929** or email us at **info@makritenorthamerica.com**. We take care of the rest.

Unmatched technical support

When you do business with Makrite, we are your support team. We work diligently to answer all of your technical questions within 24 hours or less.

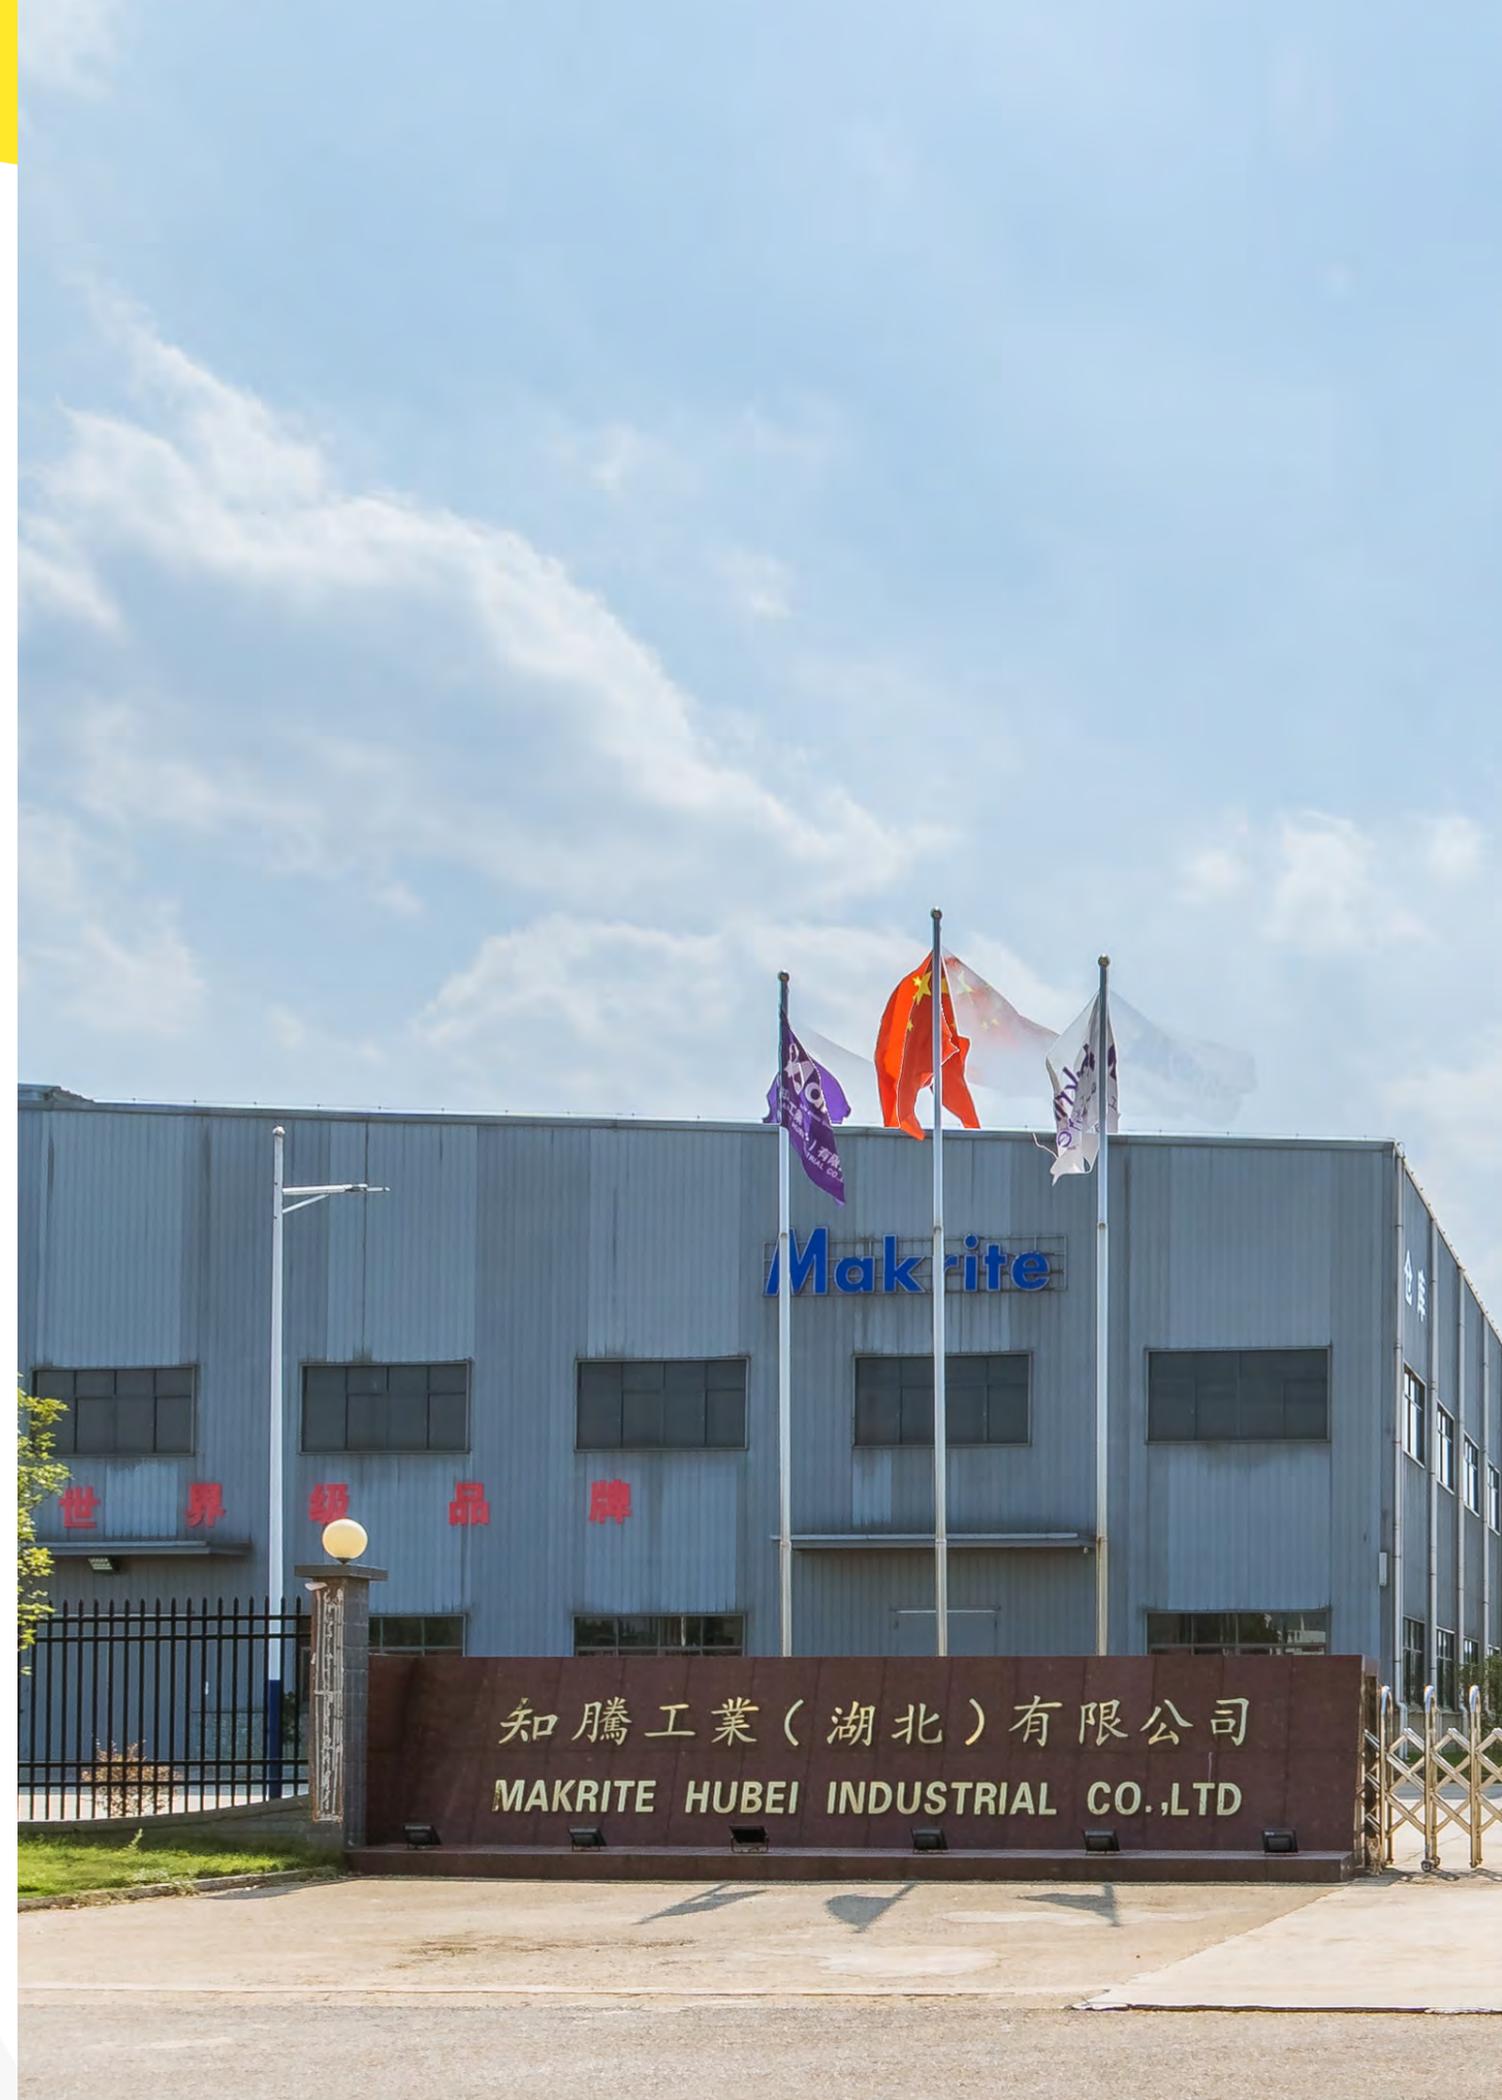

Excellent marketing & sales support

We also help your business by offering services such as product training programs, product photos, catalog preparation assistance, strategic discussions and more.

Retail packaging options

All of our respirators and other face mask products are available in a wide range of packaging options to meet your needs—and those of your customers. These include clam shells, polybags with header cards, blister cards and more. We also offer customizable vending packs of one or two respirators in a bag with an instruction sheet.
